PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student (CGPA: 83.5%) with hands-on project experience in front-end web development (HTML5, CSS3, JavaScript, React JS) and a strong foundation in Core Java and Object-Oriented Programming. Skilled at translating design requirements into functional, well-structured web applications, with additional exposure to embedded systems and IoT. Seeking an entry-level Java Full Stack Developer role to apply and grow programming, web development, and problem-solving skills in a professional team environment.

TECHNICAL SKILLS

Programming Languages: Core Java, Embedded C

Concepts: Object-Oriented Programming (OOPs)

Web Technologies: HTML5, CSS3, JavaScript, React JS

Tools & Platforms: MS Office, Internet Research

Soft Skills: Problem-Solving, Communication, Team Work, Time Management, Adaptability, Organization

PROJECTS

Recruitment Management System | *HTML, CSS, JavaScript*

- Designed and developed a web-based recruitment management application as part of an Object-Oriented Software Engineering course project, applying core OOP design principles to structure the system.
- Built responsive, user-friendly front-end pages using HTML5 and CSS3, with JavaScript for form validation and dynamic interactive behavior.
- Modeled key workflows such as job postings and candidate applications, focusing on clean UI structure and modular design.

Gas Detecting System | *Embedded C, IoT, Embedded Systems*

- Developed a real-time gas leak detection system for an Embedded Systems and IoT course project, programmed in Embedded C.
- Interfaced gas sensors with a microcontroller to detect gas concentration and trigger real-time alerts.
- Gained practical experience in hardware-software integration, sensor interfacing, and embedded programming logic.
